

Advance OnePage Checkout :

Title : Advance Onepage Checkout 0.1.1

Description :

Advance Onepage Checkout is an extension which customer can skip few process to simple checkout process. Customer not need to fill-up **billing & shipping** address two-wise, By default, **shipping address** will be save as a customer's billing address.

Customer not need to choose **Shipping method**, its internally set a shipping method, Administrator user can set from admin panel.

features :

1. Customer not need to fill-up billing address, only need to fill-up shipping address only.
2. Customer not need to choose shipping method for their order.
3. By default shipping method that administrator user can manage from back office.
4. Administrator can switch off or on from this back office. Its not need to developer.

Installation :

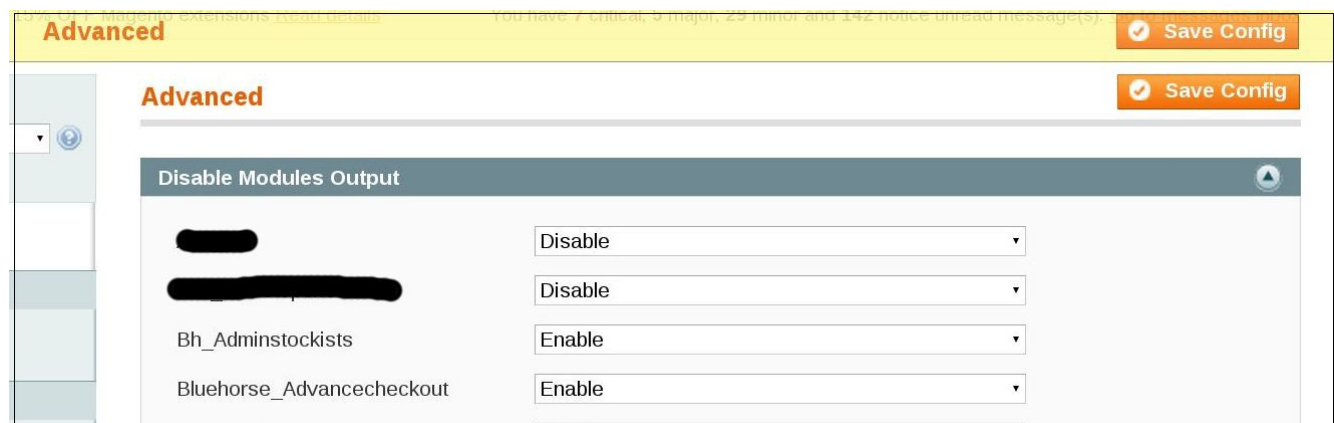

Installation process for Advance Onepage Checkout extension is very simple. You can install this extension two way one in using **Magento Connect**, second is manual replace directories & files as per as compress file.

Using **Magento Connect**, You need to loin in **Magento Connect**, after that you need to upload the extension compress file. That's it.

Using **manually**, just uncompressed the file and then copy and past same to same directory in your magento source directory. That's it.

Configuration :

After installed extension, go to Admin System->Configuration->Advanced-> Advanced tab and you can see something like that,

Here you can see you installed extension is enabled, So right now need to configure of your extension.

Go to the following **System->Advance Checkout ->General setting**, you will can see the following screen.

The screenshot shows the Magento Admin interface. At the top, a green message box states "The configuration has been saved." Below this is the "General Setting" section for the "Freeshipping" extension. The "General" tab is selected. The "Enabled" dropdown is set to "Disable", with a note: "Enabled will disable this extension". The "Shipping Method code" text field contains "freeshipping_freeshipping", with a note: "Enter the shipping method code which will be selecte automatically." Both fields have a "[STORE VIEW]" link to the right. A "Save Config" button is in the top right corner. The left sidebar shows the navigation menu with "Freeshipping" selected.

Here You see the two option one is **Enabled**, that means switch on off option. Next is **Shipping method code**, which is default shipping method name. In this field, I filed *freeshipping* because I want to set my default shipping method is free shipping.

Cheers !
